CONTAINERS

GEOPOT®

BESTSELLER

ONE SOLUTION FOR ALL YOUR FABRIC POT NEEDS

GEOPOT fabric pots help growers achieve the ideal root environment for water and nutrient uptake, ensuring robust plant growth and increased yields. They are constructed of the thickest non-woven geotextile material available, allowing air to easily reach your plants' root zones while delivering superior drainage and improved aeration. GeoPot fabric pots are reinforced with high-quality bonded-polyester thread and are available in black or tan with optional handles to accommodate your growing environment.

STRONG, DURABLE CONSTRUCTION

Non-woven fabric and double-stitching with marine-grade thread.

VELCRO FOR SAFE TRANSPLANTING

Easy access for protecting the roots during the transplant process.

STURDY HANDLES FOR EASY MOVING

Strong reinforced grip for relocating your plants.

GEOPOT®

ONE SOLUTION FOR ALL YOUR FABRIC POT NEEDS

TAN POTS FOR OUTDOOR ENVIRONMENTS

Allows for cooler soil and better blending into the natural area.

XL SIZES UP TO 1,000 GALLONS

Perfect for commercial and large-scale grows.

SIZE (GAL)	1	2	3	5	7	10	15	20	25

G-LITE®

AFFORDABLE FABRIC POT OPTIONS
FOR COST-CONSCIOUS GROWERS

G-LITE

G-LITE WITH
HANDLES

G-LITE XL

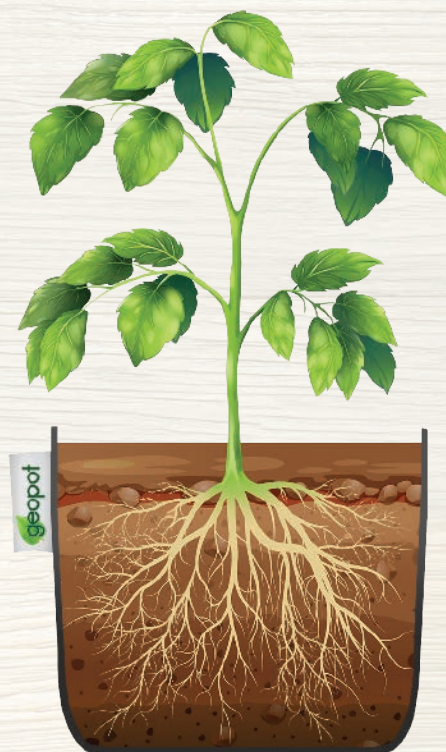

G-LITE containers are constructed of a slightly thinner material than GeoPot fabric pots, giving growers an economical alternative without sacrificing quality. Every pot's seams are double-stitched for durability with the same high-quality bonded-polyester thread used in the GeoPot, which allows for sufficient structural rigidity during transplant and throughout a plant's life cycle. They are available with optional handles to make moving your plants easy, quick, and safe.

Handles are available in select sizes. To see the full list of available options, please visit our website.

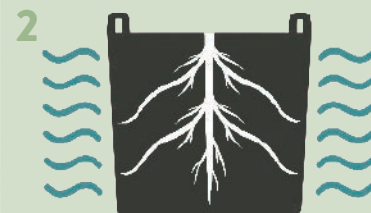

THE BENEFITS OF AIR ROOT PRUNING

AIR ROOT PRUNING exposes root tips to dry air, pruning the roots and enabling the plant to create new secondary feeder roots. This prevents the plant from becoming root-bound and provides more root surface for increased absorption of water and nutrients. The overall effect is a well-developed root system grown in a fraction of the time.

The roots of the plant grow outward through the soil in search of water and nutrients.

As the roots reach GeoPot's porous material, exposure to dry air stops forward growth.

This self-pruning stimulates the growth of secondary feeder roots.

The process repeats, creating a more efficient root system for better absorption and healthier plants.

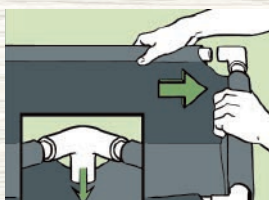

GEOPLANTER®

The **GEOPLANTER** is a durable fabric raised bed with a rigid PVC frame for all planting needs. Its breathable material allows for superior drainage and air root pruning, which encourages roots to branch out with more fibrous feeder roots that are much more efficient in taking up water and nutrients, leading to improved yields. The fabric is UV-stabilized for years of use in direct sunlight and requires no tools for assembly.

SUPER EASY ASSEMBLY

Get ready to grow in minutes with no tools required!

GEOPLANTER® ACCESSORIES

The **GEOPLANTER TRELLIS KIT** is the perfect solution for giving plants better support, light distribution, and airflow. The wide, durable design of the 6-inch squares of clear lightweight plastic and double-reinforced perimeter edges let gardeners easily add supportive bamboo stakes or plant ties, increasing the load-bearing weight. Also included are PVC connectors to simply attach to the frame of your GeoPlanter fabric raised bed.

GROW ON A PALLET

Perfect for reorganizing your space or filling and amending!

CREATE A ROOFTOP GARDEN

Compatible with the most remote growing environments.

CUSTOM GREENHOUSE POLY MEASUREMENT GUIDE

STEP 1

Measure dimension **'A'** on your greenhouse frame. Dimension **'A'** will be your **'width'** measurement for your greenhouse or blackout poly. This measurement should be taken using the full length of the support beam as pictured. We recommend rounding this measurement up to the nearest foot and adding one extra foot to get a full edge to edge seal. Write this measurement down.

STEP 2

Measure dimension **'B'** on your greenhouse frame. Dimension **'B'** will be the **'length'** of your greenhouse or blackout poly, and should be measured from the outside end of your support structure to the opposite outside end. Round this measurement up to the nearest foot and write it down.

STEP 3

Using the measurements taken, let your local grow store know the dimensions in **A x B (width x length)** — once your dimensions are confirmed, a Left Coast Wholesale representative will provide a price quote and estimated delivery time. Happy growing!

SUNGROWER SUPPLY®

PRE-CUT GREENHOUSE POLY

SUNGROWER SUPPLY GREENHOUSE POLY is made to last multiple seasons and is available in 6, 8, and 12 mil. Growers can count on Sungrower Supply's greenhouse materials that are built to last in even the toughest environments.

SUNGROWER SUPPLY®
PRIVACY FENCING

SUNGROWER SUPPLY PRIVACY FENCING is a durable poly screen fabric with a reinforced hem and grommets for easy installation. In addition to privacy, this fencing is great for keeping wild animals out and protecting your outdoor pets by giving them a confined space to roam and keeping them from becoming a nuisance to neighbors.

6'X300'	MSRP \$661.75
---------	---------------

GROUND COVER

Strong, durable, and resistant to weed penetration, this **GROUND COVER** helps to reflect light and reduce heat on your plants. The White Ground Cover can also be used as an alternative to a frost blanket. When applied on top of plantings, it protects against light frost and cold temperatures by holding heat in during the day and by blocking wind at night.

3 OZ WHITE	12' X 300'	15' X 300'
MSRP	\$766.86	\$958.58

POND LINER

One of the strongest pond liners on the market, the **40 MIL POND LINER** is available for custom-cut sizes up to 45,000 square feet in a single piece. Thanks to its potable-grade material, this pond liner is rated safe for human drinking water and is also plant and fish safe.

40 MIL BLACK WOVEN	\$1.2544/SQ FT
--------------------	----------------

GREENHOUSE REPAIR TAPE

GREENHOUSE REPAIR TAPE is designed for interior and exterior applications and is great for fixing minor tears in polyethylene greenhouse film. Both tape and adhesive are UV-protected to help prevent deterioration.

SIZE	3" x 60'	4" x 50'	3" x 60'
MSRP	\$76.45	\$191.12	\$76.45

ROPE RATCHETS

The robust construction of the braided ropes and ease of use of the carabiner clips make these **ROPE RATCHETS** a must-have for any indoor or greenhouse setup. The locking pulley design of the EZ Hanger Rope Ratchet makes it ideal for hanging lighting fixtures and adjusting them to the perfect height.

ROPE RATCHET	1/4" - 1 CT	1/8" - 2 CT
MSRP	\$14.25	\$14.15

GROWING MEDIA

IHORT® PROPAGATION SUPPLIES

QUICK START PLUGS

IHORT QUICK START PLUGS' custom proprietary blend of Peat Moss, Coco Coir, and Bio Char creates the perfect growing conditions with optimum moisture and aeration. They eliminate the mess of loose soil for a cleaner, compostable alternative while propagating.

Q PLUG REFILL BAGS

THE Q PLUG provides excellent aeration and buffering for root development with superior water control over other propagation plugs. Q Plug Refill Bags are available in two size plugs: 40/40 and 45/45 sizes and will fit most standard 50-cell trays.

Q PLUG 50 COUNT PROPAGATION KIT

THE Q PLUG 50 PROPAGATION KIT is ready to roll right out of the box and gives growers at any scale the ability to propagate stunning starts and healthy clones with ease. This kit contains 50 Q Plugs in 40/40 size and a 50-Cell Plug Tray.

ROYAL GOLD SOIL® KINGS MIX

BESTSELLER

KINGS MIX is a well-aerated, moderately amended coco peat blend that uses coco chips to balance aeration with optimal water retention. It is designed to dry quickly and accept immediate feeding.

Kings Mix is lightly amended with high-nitrogen, high-phosphorus bat guano, and a mixture of additional high-quality dry amendments that will sustain plants' nutritional needs for 1-2 weeks.

KINGS MIX	1.76 CFT BAG	3 CFT BAG	1 YD LOOSE	2 YD TOTE
MSRP*	\$12.91	\$24.27	\$174.60	\$391.99

*Prices listed do not include freight

ROYAL GOLD SOIL® TUPUR

BESTSELLER

A coco fiber-based soilless product with an ideal balance of oxygen and water-holding capacity, **TUPUR** can be watered up to six times a day and is the ideal choice for automated watering systems. This blend does well in drip, ebb-and-flow, deep water culture, and aquaponics systems.

TUPUR	1.76 CFT BAG	2 YD TOTE
MSRP*	\$12.91	\$365.26

*Prices listed do not include freight

ROYAL GOLD SOIL® MENDO MIX

MENDO MIX is a heavily amended coco/soil planting mix suited for outdoor large-scale raised bed gardens in warmer climates, but it also performs well in container-style indoor gardens and greenhouses. This blend promotes adequate water retention and oxygen-holding capacity while supplying a rich fertility program of high-grade dry amendments to performance plants.

MENDO MIX	1.5 CFT BAG	1 YD LOOSE	1 YD TOTE
MSRP*	\$12.91	\$174.60	\$227.27

*Prices listed do not include freight

ROYAL GOLD SOIL® BASEMENT MIX

BASEMENT MIX is a coco blend growing media for indoor and container gardening systems. It is lightly amended with top-quality dry amendments and features an even balance of water retention and air-holding capacities. Basement Mix manages runoff and feeds oxygen into the root zone for improved performance and nutrient uptake.

BASEMENT MIX	1.5 CFT BAG	1 YD TOTE
MSRP*	\$12.91	\$227.27

*Prices listed do not include freight

BULK ORDERING To order **ROYAL GOLD** by the pallet or truckload, contact your local retailer for a quote.

FOUR SEASONS SOIL

Left Coast is proud to carry **FOUR SEASONS BULK SOIL**. Each growing medium is uniquely blended to meet the needs of different cultivators and growing styles from “blank slate” growing mediums to fully fertilized “super soils.” Custom blends are available.

BLEND 99

BLEND 99 is a light soil blend featuring excellent drainage and a small amount of fertilizer to support plants early on. It is an excellent choice for container, raised-bed, and general planting. Thanks to the addition of peat moss, which has a high nutrient holding capacity, Blend 99 reduces runoff and the risk of nutrient burn.

PRICE PER YARD* \$119.00

* Minimum order 6 yards. Price listed does not include freight.

GROW 530 PLUS

GROW 530 PLUS is a coco and peat moss-based blend that is ideal for greenhouse growers thanks to its superior drainage and ease of use. Grow 530 Plus makes a great alternative to traditional bagged potting soils due to improved fertilizer levels and the added benefits of mycorrhizae.

PRICE PER YARD* \$145.00

* Minimum order 6 yards. Price listed does not include freight.

FOUR SEASONS BULK SOIL is available in a variety of formulations and custom blends. Contact your local store for shipping from Penn Valley, CA. Scan the QR code for more information.

PACIFIC SUBSTRATES®

PACIFIC SUBSTRATES develops premium substrate blends and growth media for mushroom cultivators. Whether you're fruiting in tubs, bags, or beds, their Paddy Poo and Goonie Grains products harness ingredients like compost, coco coir, gypsum, lime, whole oats, and sorghum to provide the ideal substrates and grain spawns for high-quality specialty mushroom cultivation.

PACIFIC SUBSTRATES	PADDY POO	GOONIE GRAINS	MIXED CASE
QTY	Substrate 4lb	Grain Spawn 4lb	6xPP + 3xGG
MSRP	\$24.00	\$30.00	\$234.00

Pacific Substrates was founded in Oakland, California, to make mushroom cultivation economically viable for individuals and businesses by combining new technology with established distribution channels.

PACIFIC SUBSTRATES®

GOONIE GRAINS

GOONIE GRAINS is a production-ready grain spawn mix to help you grow and expand thriving mycelium. Whether you're spawning to tubs, bags, or beds, this rapidly colonizing oat and sorghum blend is the ideal grain spawn for specialty mushroom cultivation.

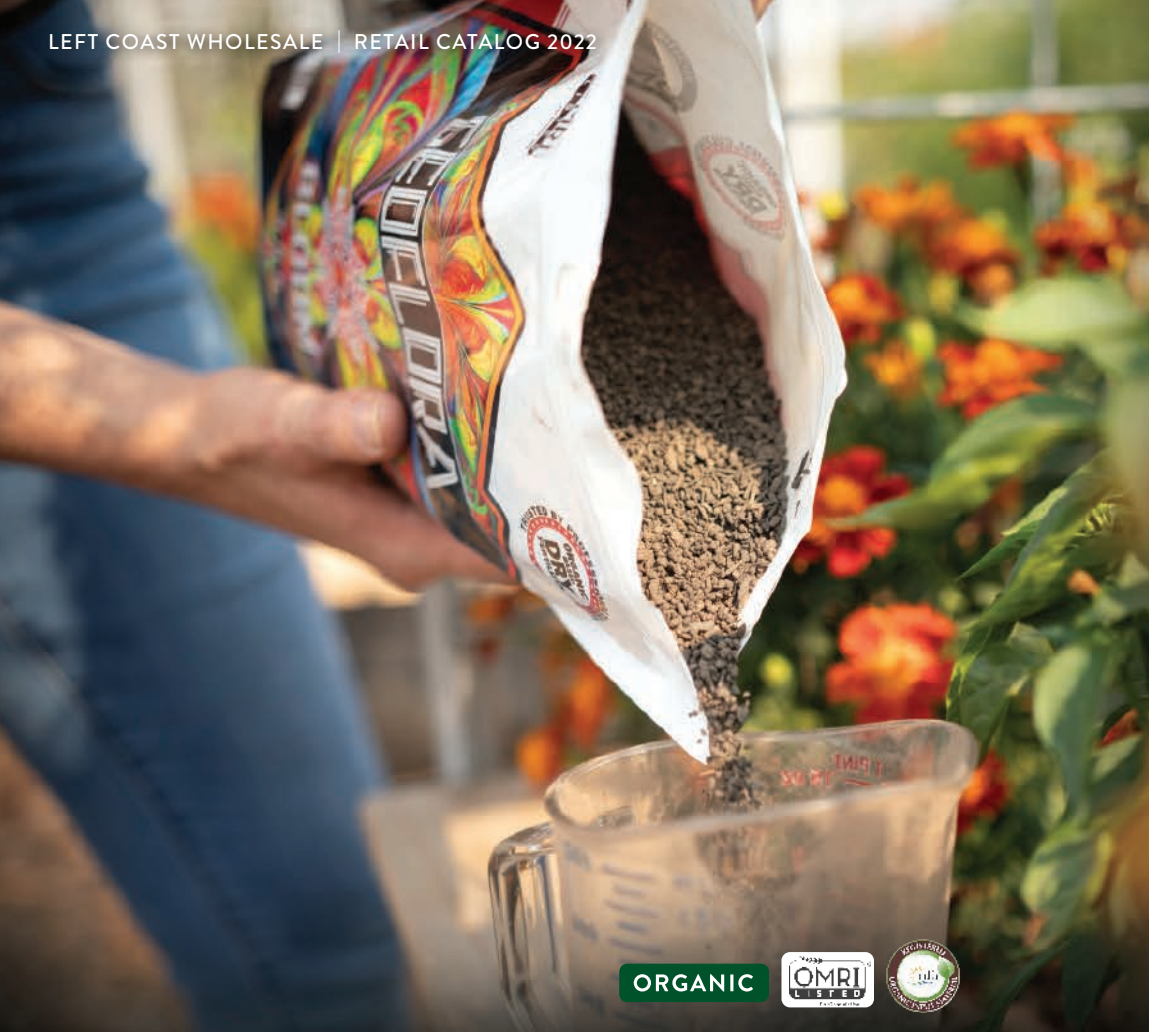

PACIFIC SUBSTRATES®

PADDY POO

PADDY POO is a broad range compost-based substrate mix that will help you grow incredible mushrooms, promote increased yields, and provide an ideal nutrient profile for compost-loving mushroom varieties.

NUTRIENTS & SUPPLEMENTS

ORGANIC

GEOFLORA® NUTRIENTS

GEOFLORA® NUTRIENTS takes the guesswork out of organic growing by delivering a granular blend of balanced organic ingredients with a simple, safe, and dustless top-dress application. This allows commercial cultivators and hobby gardeners alike to enjoy a high-quality, easy-to-use fertilizer at a reduced cost.

Formulated specifically for high-value cash crops and medicinal plants, Geoflora Nutrients combines high-quality organic inputs with a boost of beneficial bacteria to ensure every plant has access to robust sources of immediate and slow-release macronutrients to prevent burning and establish a healthy root zone early on.

ORGANIC

GEOFLORA® VEG

GEOFLORA VEG is an organic, granular fertilizer that combines diverse nitrogen sources and unique inputs to deliver all the macro and secondary nutrients needed for optimal plant growth and a healthy veg cycle. Geoflora VEG is OMRI Listed® for organic use and is a registered CDFA Organic Input Material.

ORGANIC

GEOFLORA® BLOOM

GEOFLORA BLOOM is an organic, granular fertilizer formulated to support your plants in their final stages of growth by providing them with immediate and slow-release phosphorus and potassium to encourage abundant fruit and flower development. Geoflora BLOOM is a registered CDFA Input Material and is OMRI-Listed® for organic use.

MSRP	\$22.44	\$73.80	\$128.91	\$294.23	\$590.12	\$1,958.21

PURPINATOR®

PURPINATOR is a specialty nutrient additive formulated to deliver increased flavonoid, terpenoid, and resin production in your plants. In addition to these benefits, Purpinator will improve the coloration of plants with purple phenotypes by enhancing the plant's ability to produce color-influencing compounds. It can be deployed in any growing system and is designed to be used as a root drench for soil, coco, or hydroponic growing media.

PURPINATOR®	1 QT	1 GAL	3 GAL	6 GAL	15 GAL	55 GAL
MSRP	\$25.83	\$86.15	\$150.74	\$337.89	\$678.58	\$2,111.84

DYNAMYCO®

DYNAMYCO is a top-quality mycorrhizal inoculant that supercharges a plant's ability to absorb and utilize nutrients in the soil. This highly concentrated additive contains 900 propagules per gram of endomycorrhizal fungi that connect to the roots and form a symbiotic relationship with the plant, helping it to reach optimal health and maximum yields.

GREEN PLANET®

MASSIVE BLOOM **BESTSELLER**

MASSIVE BLOOM is a comprehensive additive containing all the elements plants require to produce large, healthy flowers, such as L-form amino acids, a specially formulated vitamin profile, a unique blend of carbohydrates, a chelated mineral profile, and a combination of essential nutrients like phosphorus and potassium.

DUAL FUEL 1 & 2

DUAL FUEL'S 2-PART FORMULA provides the nitrogen, phosphorus, potassium, and secondary micronutrients that plants need at various stages of growth. Both bottles are used in a 1:1 ratio throughout the entire crop cycle, making it ideal for commercial growers with injector systems and novice growers wanting a simple solution.

REZIN

REZIN is an aroma and flavor enhancer developed to greatly increase the essential oil and resin production of flowering plants. It provides a readily available source of molybdenum (Mo) and vitamin B1 to aid with plant growth and help convert nitrates into valuable forms of nitrogen and amino acids.

GREEN PLANET®

LIQUID WEIGHT

Liquid Weight is a supplemental blend of simple and complex carbohydrates that supports the beneficial microbial life in the root zone. This leads to an increase in the absorption of essential nutrients that help develop impressive aromatic flowers and fruits.

VITATHRIVE

Vitathrive is a comprehensive additive blend of vitamins and minerals formulated for the vegetative stage of plant growth. This propagation supplement is designed to reinforce plant health and support essential functions.

GREEN PLANET fertilizers are designed for any novice-to-expert cultivator looking to reach new heights. "Better Formulas and Better Ingredients for Better yields."

GREEN PLANET®

HORTI-RAWK

Horti-rawK is a one-of-a-kind flowering additive that gives your plants a large dose of potassium (K) during heavy fruiting and flowering. By introducing a 0-0-62 straight potassium formula, Horti-rawK ensures you get the maximum weight out of your flowers when it comes time to harvest.

BUD BOOSTER

Bud Booster is a specialty flowering additive used in conjunction with your regular fertilizer program that delivers high amounts of phosphorus and potassium to promote blooming and assist in the plant's metabolism during the flowering stage.

KARBO BOOST

Karbo Boost is a powdered supplement that delivers an added source of carbohydrates for microbial life during the flowering stage. This encourages the rapid expansion of beneficial microbe colonies in the growth medium.

AURORA INNOVATIONS®

SOUL LIQUID LINE

SOUL GROW AND BLOOM

SOUL GROW and **SOUL BLOOM** are powerful, user-friendly blends of natural, soluble fertility compounds that will enhance plant health and increase yields. Soul Grow is formulated with the highest-quality ingredients to increase plant vigor in the growth stage, while Soul Bloom maximizes production in the bloom stage with the addition of potent botanical extracts.

AMINO-AIDE

Based on extensive, hands-on research, **SOUL AMINO-AIDE** plant supercharger is a complex amino acid blend specifically formulated to increase plant vigor and yields in both soil and hydroponic systems. Adding 5 ml per gallon of this to any regimen will show rapid, noticeable results.

GROW-N

SOUL GROW-N nitrogen supplement was specifically crafted to be a high-performance fertilizer that delivers faster growth with a targeted blend of natural nitrogen and calcium sources engineered for maximum effect and high solubility. For best results, combine these highly soluble, fast-acting nutrients with any base nutrient program.

AURORA INNOVATIONS®

SOUL LIQUID LINE

INFINITY

SOUL INFINITY is a complex blend of natural plant nutrients formulated to increase vigor and prevent nutrient deficiencies common in fast-growing and heavy-feeding plants. This blend is fortified with two amino chelates and humic acid for extra nutrient uptake and soy protein hydrolysate to boost vigor, plus botanical extracts of bamboo, kelp, sugar cane molasses, and yucca.

BIG SWELL

SOUL BIG SWELL has been designed specifically to increase flower size, vigor, and quality. Crafted with a distinctive formula of powerful natural botanical extracts, amino acids, and molasses, this product supplies a specific ratio of available phosphorus and potassium. For exceptional results, use Soul Big Swell as an additive in conjunction with any base nutrient program.

PEAK

SOUL PEAK contains distinctive botanical extracts, as well as ample phosphorus and potassium to encourage only the strongest flowers. Years of research and extensive testing have resulted in a truly unique PK boost that enhances the vigor and production of plants during their blooming phase. It also includes alfalfa extract that is a natural source of nutrition to boost yield.

AURORA INNOVATIONS®

ROOTS ORGANICS

BUDDHA GROW & BUDDHA BLOOM

BUDDHA GROW and **BUDDHA BLOOM** promote plant health, substantially increase yields, and enhance the quality of production and flavor in soil-grown plants during their growth and flowering stages.

SURGE

SURGE'S addition of natural sugar, kelp, and humic acid to a powerful fish base creates a potent fusion of natural compounds to ensure faster growth, greater yields, and lush plants rich with essential oils.

TRINITY

TRINITY is a distinctive formula of complex carbohydrates combined with soy protein extracts to encourage plant vigor, reduce stress, maximize root growth, and increase plant yields. Compatible with any nutrient program.

EXTREME SERENE

EXTREME SERENE captures the fast-growing power of marine kelp to encourage vigorous shoot and root growth. This revolutionary new formula improves upon the original with crucial components in various kelp species and a stabilized solution for maximum absorption.

AURORA INNOVATIONS®

ROOTS ORGANICS

ANCIENT AMBER

ANCIENT AMBER is a highly-soluble natural nitrogen source extracted from nettle and a non-GMO soybean meal. This foliar spray is perfect for the transition period between veg and flower.

HP2

HP2 liquid seabird guano is a natural source of phosphorus, ideal for use during flowering and fruiting. HP2 is minimally processed to preserve all of the benefits found in seabird guano and biogenic phosphate rock, and works well in blends of soil that do not use coco.

HPK

HPK liquid bloom booster features a combination of seabird guano and phosphate rock, combined with langbeinite, a powerful source of potassium and magnesium. HPK is minimally processed to preserve all the benefits and amazing synergistic qualities of the ingredients, and works well in coco soil blends.

RAIN

RAIN promotes water penetration and aids in the dispersion of foliar applications. A combination of the natural wetting agents yucca and quillaja, this product reduces water surface tension and enhances the movement of solutions and soluble nutrients throughout the rhizosphere.

AURORA INNOVATIONS®

ROOTS ORGANICS

CALMAG

CALMAG is a pure and all-natural blend of calcium, magnesium, and sulfur to support plants during fast growth. As a product free of added nitrogen, phosphate, and potassium, CalMag allows growers the control to supplement as needed without affecting primary fertility input ratios.

AURORA INNOVATIONS' mission is to turn the world's finest ingredients into the most beneficial nutrients designed to improve plant health and increase yields.

GROWTH SCIENCE® NUTRIENTS

GROWTH SCIENCE ORIGINAL LINE

BASE A AND B

BASE A AND B FROM GROWTH SCIENCE is a two-part base formulation that makes dialing in your grow easy. Base A contains nitrogen and key micronutrients like calcium and magnesium to support essential plant function and encourage vegetative growth. Base B brings phosphorus, potassium, and key micronutrients specifically selected to meet the needs of the plant during both vegetative and flowering stages.

STRENGTH

STRENGTH is a silica supplement designed to strengthen cell walls. Strength was specially formulated to work with the Growth Science nutrient regimen to reduce stress while providing additional potassium at the early flowering stage to help the plant meet increased nutrient demands.

ROCK SOLID

ROCK SOLID is a powerful, cost-effective bloom booster for the flowering cycle that doubles as a P/K booster to provide additional phosphorus and potassium in bloom. Rock Solid also incorporates proprietary plant extracts in this blend to aid in flower site development. These added components facilitate improved overall harvest yields as well as maximized resin and aromatic production.

GROWTH SCIENCE® NUTRIENTS

GROWTH SCIENCE ORIGINAL LINE

SOLID START

SOLID START is a vegetative cycle booster derived from cold-pressed kelp that can be used as a root drench or foliar spray. Extra nitrogen and potassium also help bolster the necessary macronutrients needed to support vigorous vegetative growth, while minerals and compounds found in the cold-pressed kelps aid in vital plant processes.

GROWTH SCIENCE® ORGANICS

GROWTH SCIENCE ORGANIC LINE

GROW

GROW'S organic formulation of fish protein hydrolysate and soy protein hydrolysate helps provide ample nitrogen and amino acids to support healthy vegetative growth and a solid start for your plant. This formula is a CDFA OIM, WSDA-Registered Material, Clean Green Certified, and OMRI Listed.

GROWTH SCIENCE® ORGANICS

GROWTH SCIENCE ORGANIC LINE

OPULENT HARVEST

OPULENT HARVEST is an organic bloom booster that encourages the development of larger, more aromatic flowers and high-quality fruits. Packed with biodynamic ferments of nettle, comfrey, dandelion, horsetail, and alfalfa combined with natural potassium, Opulent Harvest delivers a unique combination of all-natural compounds designed to maximize your flowering output.

ROOT MAGIC

ROOT MAGIC is a unique combination of extracts from some of nature's top performers blended in a convenient, powerful package. Molasses, kelp, and aloe vera feed microbes while creating a truly healthy foundation in the soil. Root Magic can also be used on cuttings and seedlings.

With a passion for organic growing, GROWTH SCIENCE develops fertilizers that provide essential elements in the most direct and cost-efficient way possible.

ORGANIC

ECOMAX™ NEEM FERTILIZER

ECOMAX is a slow-release organic nutrient derived from neem that is rich in protein, carbohydrates, macronutrients, and trace micronutrients that support plant nutrition and improve soil health. ECOMAX enhances nutrient uptake through chelation with macro- and micronutrients in the cultivation medium, while reducing the alkalinity of the soil.

ECOMAX is developed by Ecostadt Technologies, a company with a foundation in natural and sustainable solutions that ensure the safety of your final product.

NEW!

ORGANIC

SIERRA NATURAL SCIENCE

Made with safe and effective formulas from organic botanicals and herbs, Sierra Natural Science's OMRI-listed pesticides kill common garden pests with no harsh chemicals, while its fungicides eliminate common molds, mildews, and diseases.

SNS 203

NEW!

ORGANIC

SNS 203 PEST SOIL DRENCH can also be used as a foliar spray with active ingredients that dehydrate and kill pests and reduce their available food sources. Safe around kids and pets, this blend kills and repels root aphids, fungus gnats, white flies, gnat larvae, thrips, and more.

SNS 209

NEW!

ORGANIC

SNS 209 SYSTEMIC PEST CONTROL works by allowing plants to absorb small amounts of rosemary oil and distributing it throughout its cell walls. This creates a barrier that insects don't like, causing them to stop eating, move on, or die. Effective against spider mites, broad mites, russet mites, root aphid larvae, thrips, fungus gnats, cabbage maggots, and more.

SNS 217C

NEW!

ORGANIC

SNS 217C SPIDER MITE CONTROL kills spider mites and their eggs by coating them with an oily shield which prevents respiration. Mites dry out and die, while their eggs are prevented from hatching. Spray on affected plants to kill and repel spider mites, broad mites, russet mites, and their eggs.

SIERRA NATURAL SCIENCE

SNS 244C

NEW!

ORGANIC

SNS 244C FUNGAL CONTROL is absorbed systemically by the plant, suppressing the life cycle of fungal spores and nurturing a plant's ability to fight and prevent disease. Use to kill and control fusarium, leaf rust, mildew, and other plant fungal diseases.
