

SNS 209™

SYSTEMIC PEST CONTROL

SIERRA
NATURAL
SCIENCE

WWW.SIERRANATURALSOURCE.COM

FOR ORGANIC
GARDENING

HOW IT WORKS

SNS 209 works by allowing plants to absorb small amounts of rosemary and distributing it throughout its cell walls. This creates a barrier that insects don't like, causing pests to stop eating, move on or die.

PESTS

Use 209 on pests like spider mites, broad mites, russett mites, root aphid larvae, thrips, fungus gnat, cabbage maggots & more.

Spider Mites

Root Aphid

Thrips

Fungus Gnat

BENEFITS

- Systemic = Entire plant is protected (roots, stems, leaves)
- Can be used in organic production
- 0-Day re-entry interval
- EPA Exempt
- Safe around children & pets, when used as directed

APPLICATION INSTRUCTIONS

ROOT DRENCH

Shake well before mixing. Mix 1/4 oz. per gallon of water. Thoroughly drench affected area and surrounding areas.

FOLIAR SPRAY

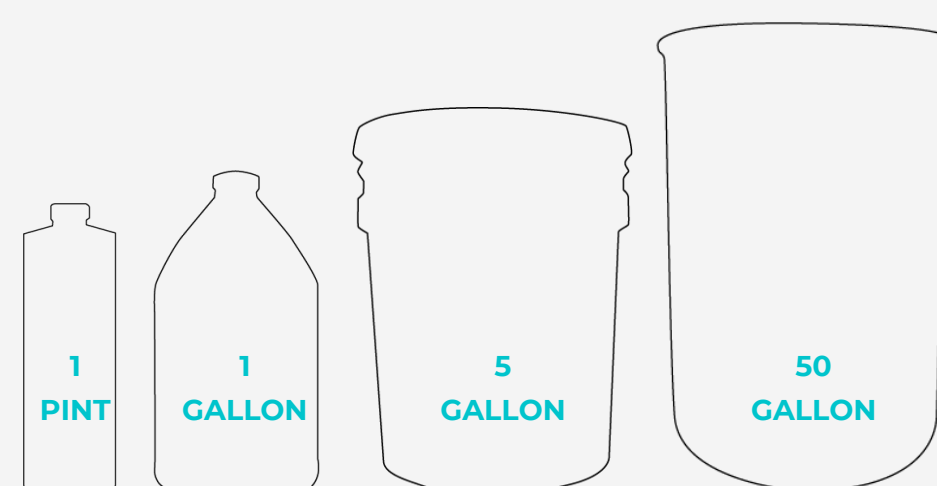

Mix 1 oz. per gallon of water.
Spray Foliage to point of runoff.

ROW CROPS

Mix 2-6 quarts per acre. Feed solution onto the root area every time you water until infestation reduces.

USE 209 EVERY 7-14 DAYS FOR PREVENTATIVE MAINTENANCE. REFER TO THE SUPPLEMENTAL LABEL & USE GUIDE.
