

# BOVEDA®

## HUMIDITY CONTROL PACKS

- ✓ HARVEST
- ✓ PACKING
- ✓ STORAGE
- ✓ HUMIDITY

**BOVEDA HUMIDITY CONTROL PACKS** continually respond to ambient conditions by adding or removing moisture to affect the enclosed environment, delivering a predetermined relative humidity level during periods of storage. Boveda features a hyperfiltration membrane that inhibits the passage of any impurities, ensuring that products are exposed only to clean, pure water vapor.

### AVAILABLE SIZES:

AVAILABLE IN 58% AND 62% HUMIDITY LEVELS, IN 8 G, 67 G, AND 320 G POUCHES.

## HOW TO USE BOVEDA

**BOVEDA** products are maintenance-free and require no activation, just add it to your dried matter and you're done. Best of all, Boveda is good for any humidity sensitive product; it can be used in a full range of relative humidity levels to preserve the precise humidity needed.

## WHY USE BOVEDA

**BOVEDA HUMIDITY CONTROL PACKS** deliver a predetermined relative humidity in an environment, keeping contents at the desired humidity level during periods of storage. Boveda features a hyperfiltration membrane that inhibits the passage of any impurities, ensuring that products are exposed only to clean, pure water vapor. Boveda Humidity Control Packs last 2-6 months, depending on climate conditions and the volume of material being controlled. Boveda Humidity Control Packs are available in three humidity levels, allowing the user to select their desired moisture content levels.
