

**DYNOMYCO®**

MYCORRHIZAE

TRANSPLANT
ADDITIVE

DYNOMYCO is a top-quality mycorrhizal inoculant that supercharges a plant's ability to absorb and utilize nutrients in the soil. This highly concentrated additive contains 900 propagules per gram of endomycorrhizal fungi that connect to the roots and form a symbiotic relationship with the plant, helping it to reach optimal health and maximum yields.

AVAILABLE SIZES

3.5 OZ, 7 OZ, 12 OZ, 1.65 LB POUCH,
22 LB, 44 LB PAIL

**WHY USE DYNOMYCO**

With **DYNOMYCO**, 90% of the applied phosphorus becomes available to the plant due to mycorrhizal colonization. This reduces runoff and improves overall yields as phosphorus is key to bud production. **DYNOMYCO** is three times more concentrated than the leading competitor, and costs can be as much as 5x less per plant.

**HOW TO USE DYNOMYCO**

DYNOMYCO is best suited for application prior to transplant in the transplant hole or mixed into the growing medium at a rate of 1 teaspoon per gallon container, or 2 tablespoons per cubic foot of media.

Dynomyco can be applied as a top dress if necessary. Do not use with systemic pesticides.
