

FLOWER TOWER DRY RACKS

HARVEST

DRYING

Available in either an open buckle or closed zipper style, **FLOWER TOWER DRY RACKS** make even drying of harvested products easy and reliable. Flower Tower Dry Racks are constructed with a soft coated mesh material to prevent damaging flower material, plus a central strap to prevent bowing or collapsing. The Flower Tower Dry Racks with clips includes six to eight support straps depending on the size of the top rack and clips on every level, making it easy to add or remove rack layers as needed.

BUCKLE & ZIPPER DRY RACKS

Choose from buckle-style or zipper-style, depending on whether you have a dedicated room for drying. The buckle-style **FLOWER TOWER DRY RACKS** will fully expose the plant matter you're drying to allow for maximum airflow, whereas the zipper-style Flower Tower Dry Racks will protect

OPEN BUCKLE

CLOSED ZIPPER

the plants you're drying by keeping them fully enclosed in a soft screen-like material, keeping bugs, dust, and pollen at bay.
