

G-LITE®

AFFORDABLE FABRIC POT OPTIONS FOR COST-CONSCIOUS GROWERS

- ✓ LIGHT DUTY
- ✓ GEOTEXTILE FABRIC
- ✓ SQUARE BOTTOM FOR STABILITY
- ✓ COMMERCIAL GROWING

G-LITE features the same durable construction and air-pruning capability as the GeoPot line, with double-stitched seams for durability, and the same high-quality bonded-polyester thread used in the traditional GeoPot. This sturdy construction allows for sufficient structural rigidity during transplant and throughout your plants' life cycle at a lower cost, making it ideal for scaled operations or one-time use grows.

WHY USE G-LITE

G-LITE containers are constructed of a slightly thinner material than GeoPot fabric pots, giving growers an economical and disposable alternative to the traditional GeoPot without sacrificing quality. Sizes up to 10 gallons available with optional handles to make moving your plants easy, quick, and safe.
