

GEOPOT®

ONE SOLUTION FOR ALL YOUR FABRIC POT NEEDS

BESTSELLER

- ✓ HEAVY DUTY
- ✓ QUAD STITCH
- ✓ FABRIC POTS
- ✓ GEOTEXTILE FABRIC

GEOPOT fabric pots help growers achieve the ideal root environment for water and nutrient uptake, ensuring robust plant growth and increased yields. They are constructed of the thickest non-woven geotextile material available, allowing air to easily reach your plants' root zones while delivering superior drainage and improved aeration. GeoPot fabric pots are reinforced with high-quality bonded-polyester thread and are available in black or tan with optional handles to accommodate your growing environment.

AVAILABLE SIZES

- 1-1000 GAL (W/OOUT HANDLES)
- 1-65 GAL (WITH HANDLES)
- 1-7 GAL (VELCRO)

BENEFITS OF AIR ROOT PRUNING

Fabric pots like the **GEOPOT** give your plant the benefits of air root pruning. Air root pruning exposes root tips to dry air, pruning the roots and enabling the plant to create new secondary feeder roots. This prevents the plant from becoming root-bound and provides more root surface for increased absorption of water and nutrients. The overall effect is a well-developed root system grown in a fraction of the time.

VELCRO AND HANDLE VARIETIES

GEOPOT FABRIC POTS are available with durable, easy-carry handles that make moving your plants simple. For smaller sizes, two handles stitched onto the reinforced hem of the pot help support the weight of a potted plant. Larger sizes feature 4 reinforced handles to support heavier loads.

There are also GeoPot options that employ a Velcro seam that allows the side of the pot to open for easy root ball removal during transplanting.

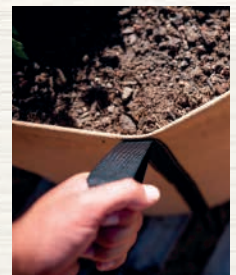

Velcro and Handles are not available in all sizes and colors. To see the full list of availability and pricing, visit our website.

GARDEN KIT

The **GEOPOT GARDEN KIT** comes with a hand selected variety of GeoPot products perfect for starting a container garden. With handled pots, velcro transplanters, and the original GeoPot, the Garden Kit is a great place to start if you are unfamiliar with fabric pots and want to get better results in your garden!

INCLUDES:

- (1) 1-Gallon Velcro
- (1) 5-Gal GeoPot w/ Handles
- (2) 7-Gallon GeoPot

ROUND BOTTOM GEOPOT

The **ROUND BOTTOM GEOPOT** offers the same reliable function and durability of regular GeoPot Fabric Pots, but features a slightly slimmer, vase-like shape that can help showcase ornamental or decorative plants. It can also be used for small scale container growing of deep rooting plants and vegetables.

AVAILABLE IN 2-5 GALLONS.

HANGING GARDEN

The **GEOPOT HANGING GARDEN** comes in 2 and 4 pot varieties, and are ideal for hanging on a fence or balcony - we recommend these for smaller decorative plants and strawberries. Bring the benefits of air root pruning to your hanging garden!

AVAILABLE IN 2 & 4 POCKET VARIETIES, APPROXIMATELY ½ GALLON PER POCKET.

HANGING BASKET

Hanging pots are a great way to utilize otherwise unavailable growing space in your garden. The **GEOPOT HANGING BASKET** is an excellent choice for flowers and succulent plants with long, downward growth patterns. A must have for any patio or balcony!

AVAILABLE IN 2 GALLON

SQUAT POT

The **SQUAT POT** uses the same material and design as the traditional GeoPot with a shorter, wider footprint. Recommended for shallow rooting plants, succulents, and lettuces, the Squat Pot gives the benefits of air root pruning to a wide variety of plants with more overall surface area to help maximize space and create beautiful succulent arrangements.

AVAILABLE IN 2-15 GALLONS, 400 GALLONS
