

GEOFLORA VEG

GEOFLORA VEG 5-3-4 NPK FORMULA

- Promotes vigorous canopy and stem growth and healthy root development.
- Multiple sources of quick and slow-release nitrogen ensure a balanced and sustained delivery of nutrients while preventing nutrient burn.
- Establishes strong microbial activity for increased nutrient uptake and availability.

GEOFLORA

ORGANIC GROWING MADE EASY

GROW ORGANICALLY

- ✿ OMRI-listed, CDFA OIM formulas
- ✿ 19 premium organic ingredients
- ✿ Simplifies organic growing
- ✿ Beneficial bacteria take each ingredient to its full potential

GO GRANULAR

- ✿ Granular form factor
- ✿ Dustless with no harmful airborne particles
- ✿ No nutrient hotspots
- ✿ Even and balanced distribution of ingredients

BOOST YIELDS

- ✿ Boosts yields and increases potency
- ✿ Encourages vigorous growth & abundant flower production
- ✿ Reduces costs by 20% or more
- ✿ Formulated for use on high-value cash crops & medicinal plants

FEED CHART

WEEK	AT TRANSPLANT	WEEK 2	WEEK 4	WEEK 6	WEEK 8	WEEK 10	WEEK 12
VEG	1 CUP	1 CUP	1 CUP	-	-	-	-
BLOOM	-	-	-	1 CUP	1 CUP	1 CUP	WATER ONLY

AMENDING: Mix 1 cup of Geoflora per 10 gallons (1.34 ft³) of growing medium 24 to 48 hours prior to transplant. For best results, keep growing media moist.

TOP DRESS: As a top dress, apply 1 cup of Geoflora per 10 gallons (1.34 ft³) of growing medium every two weeks (14 Days). Water in thoroughly after application. Discontinue using Geoflora two weeks prior to harvest.

WHY CHOOSE GEOFLORA?

Geoflora Nutrients began in an industrial lot next to a bunch of greenhouses, with a rented cement mixer, a whole lot of organic ingredients, a 12-pack of beer, and a can-do attitude.

With the help of a renowned scientist in the hydro space and a lot of trial and error, Geoflora's revolutionary granular formula was created out of a need for an easy-to-use organic fertilizer that could be deployed on a large scale without the downsides of traditional organics.

No more ingredient sourcing, component mixing, or dusty application required.

Just clean, simple granules for your organic grow.
