

HARVEST MORE® TRIM BIN & ACCESSORIES

- ✓ HARVEST
- ✓ ERGONOMIC
- ✓ PROCESSING
- ✓ TRIMMING

HARVEST MORE'S goal is to engineer and manufacture high-quality and user-friendly products for the horticulture industry. They have revolutionized the way people harvest by creating a comfortable, portable, and contained workspace designed around the ergonomics of the human body. Many years of research and development have allowed them to fine-tune every product in the Harvest More line, creating a variety of valuable tools for the most labor-intensive phase of your operation.

TRIM BIN SET

Designed for optimal ergonomics, the **TRIM BIN** turns any chair or surface into a comfortable, organized trimming workspace. High molded walls and rounded edges keep all plant materials contained, ensuring fast and easy cleanup.

Durable and portable, Trim Bin features a two-part tray system with a standard 150-micron or the new 220-micron screen to filter and collect larger plant particulates. Both screen sizes are available for replacement after heavy use.

TRIM BIN FILTER

The **TRIM BIN FILTER** by Harvest More is the fastest way to trim and sort product. The filter quickly separates trimmings and unwanted sizes into the attached collection bag while working.

Use the **TRIM BIN FILTER** as a light-weight stand-alone workstation, or you can stack it with the original Trim Bin set for maximum processing efficiency.

You can attach a collection bag to the Trim Bin Filter to capture sorted materials. The Trim Bin Filter is stackable with all Trim Bins; you can use all three to sort your work.

HARVEST MORE SCISSOR SCRUBBER

Clean scissors easily in seconds and without a mess using the efficient and portable **SCISSOR SCRUBBER**. Just open the lid, remove the brushes, fill the container with the preferred cleaning solution, and let your scissors soak.
