

# SNS MAIN 4

SNS 209 works by allowing plants to absorb small amounts of rosemary and distributing it throughout its cell walls. This creates a barrier that insects don't like, causing pests to stop eating, move on or die.

## SYSTEMIC PEST CONTROL

Spider Mites

Root Aphid

Thrips

Fungus Gnat

## FUNGICIDE

SNS 244 Fungicide is absorbed systemically by the plant, suppressing the life cycle of fungal spores and nurturing a plant's ability to fight and prevent disease.

Fusarium

Leaf Rust

Powdery Mildew

Black Mold

SNS 217 kills spider mites and their eggs by coating them with an oily shield which prevents respiration. Mites dry out and die, and their eggs are prevented from hatching.

## SPIDER MITE CONTROL

Spider Mites

Broad Mites

Russet Mites

Eggs

SNS 203 has active ingredients that cause pests to dehydrate and die. It also attacks fungus and algae, reducing the food source for pests.

## SOIL DRENCH/FOLIAR SPRAY

Fungus Gnat

Root Aphid

White Flies

Gnat Larvae
