

SUNGROWER®

PRE-CUT GREENHOUSE POLY

- ✓ POLY COVERS
- ✓ SHADE CLOTH
- ✓ GREENHOUSE GROWING
- ✓ LIGHT DEPRIVATION

Left Coast Wholesale offers **SUNGROWER PRE-CUT GREENHOUSE POLY** cut to a variety of options of standard lengths and widths for easy deployment. Sungrower Supply Greenhouse Poly is made to last multiple seasons and is available in 6, 8, and 12 mil. Growers can count on Sungrower Supply's greenhouse materials that are built to last in even the toughest environments.

DIFFUSION AND TRANSMISSION

You will notice two different ratings in cover descriptions. The first rating is the **LIGHT TRANSMISSION RATING**, which is a measure of how much light can reach your plants through the cover without being obscured or reflected. As a general rule, thin stocks like 4 and 6 mil will allow for more light transmission and heat retention than thicker stocks.

The second rating is for its **DIFFUSION**, which is a measure of how much light is scattered or spread out. Diffused light is more effective at penetrating deep into the canopy and is evenly distributed as opposed to hitting only the tops of your plants. This results in increased photosynthetic productivity in the entire plant, maximizing yields.

SUNGROWER DURAWEAVE 150

- ✓ 8 MIL WOVEN
- ✓ 88% TRANSMISSION

DURAWEAVE 150 is an 8 mil woven poly greenhouse cover that permits 88% light transmission in greenhouse environments. About half as thin as its 12 mil counterpart, Duraweave 150 greenhouse covers are graded to last 4 years under normal climate and growing conditions.

Ideal for hoop houses and greenhouses, Duraweave is a cost-effective and manageable solution for greenhouse growing that will last for years to come. Recommended for greenhouses in moderate-to-warm climates

AVAILABLE IN PRE-CUT WIDTHS RANGING FROM 20' - 50' AND LENGTHS 50' - 150'.

SUNGROWER DURAMAX 200

- ✓ 12 MIL WOVEN
- ✓ 85% TRANSMISSION

DURAMAX 200 is a 12 mil woven poly greenhouse cover that permits 85% light transmission in greenhouse environments. Duramax 200 greenhouse covers are graded to last 6 years under normal climate and growing conditions.

Ideal for hoop houses and greenhouses in hotter climates, Duramax 200 is a cost-effective and manageable solution for greenhouse growing that will last for years to come.

AVAILABLE IN PRE-CUT WIDTHS RANGING FROM 25' - 50' AND LENGTHS 50' - 150'.

SUNGROWER DIFFUSED POLY

- ✓ 6 MIL NON-WOVEN
- ✓ 62% DIFFUSION
- ✓ 90% TRANSMISSION

6 MIL NON-WOVEN POLY is made for greenhouses in moderate to warm climates, and permits 90% light transmission. This economical covering helps growers maintain better heat distribution to help regulate their plants.

With easy set up and removal, these durable poly covers also resist shifting temperatures, debris, hail, and other bad weather. For use in generally moderate to cooler climates.

AVAILABLE IN PRE-CUT WIDTHS RANGING FROM 25' - 50' AND LENGTHS FROM 50' - 150'.

SUNGROWER BLACKOUT POLY

- ✓ 6 MIL NON-WOVEN
- ✓ BLACKOUT

BLACKOUT GREENHOUSE POLY is a multi-layer 6 mil cover blocks all light passage, ensuring no light will reach your plants until you want it to! This film is strong, durable and resilient to harsh environmental conditions. It is manufactured using innovative polymers and extruding technologies and has a track record of high performance over many years.

Using blackout poly on your greenhouse is found to result in improved production and increased plant yield that comes from growing year-round, and it is seen as a more eco-friendly growing practice.

AVAILABLE IN PRE-CUT WIDTHS FROM 25' TO 50' AND LENGTHS FROM 100' TO 150'.

OUTDOOR MATERIALS

SUNGROWERSHADE CLOTH

Perfect for high-temperature environments, the **40% SHADE CLOTH** blocks 40% of light to retain cooler temperatures in the growing environment. While this shade cloth will provide protection from some extreme outdoor elements, it's specifically meant to lessen the intensity of the midday sun.

AVAILABLE IN PRE-CUT WIDTHS FROM 20' TO 40', AND LENGTHS FROM 50' TO 150'

SUNGROWER PRIVACY FENCING

SUNGROWER PRIVACY FENCING is a durable poly screen fabric with a reinforced hem and grommets for easy installation. In addition to privacy, this fencing is great for keeping wild animals out and protecting your outdoor pets by giving them a confined space to roam, keeping them from becoming a nuisance to neighbors.

AVAILABLE PRE-CUT 6' WIDE X 300' LONG

GROUND COVER

Strong, durable, and resistant to weed penetration, this 3 oz **GROUND COVER** helps to reflect light and reduce heat on your plants. The White Ground Cover can also be used as an alternative to a frost blanket. When applied on top of plantings, it protects against light frost and cold temperatures by holding heat in during the day and by blocking wind at night.

PRE-CUT SIZES OF EITHER 12' OR 15' WIDE X 300' LONG
