

TRIMBAG®

- ✓ HARVEST
- ✓ TRIMMING
- ✓ PROCESSING
- ✓ BLADELESS

The **TRIMBAG** is the first collapsible, bladeless, handheld dry trimmer on the market specially designed for the processing of dried medicinal herbs. The patented tumble trim method combined with the robust construction that Trimbag is known for allows for up to 2 pounds of dry product to be trimmed in just 15 minutes.

WHY USE TRIMBAG

Specially designed for processing herbs, Trimbag gives you a collapsible, bladeless, handheld dry trimmer that is simple to use and can process 2 pounds of product in about 15 minutes. The **TRIMBAG** saves you even more time with the minimal maintenance it requires to work well every season. All it requires is removal of debris between uses and occasional lubrication of the zipper. This is the easiest harvest clean up you'll have.

HOW TO USE A TRIM BAG

- 1 EXPAND** the Trimbag by releasing the buckles on the side.
- 2 UNZIP FROM THE TOP** and fill to about 1/3 of height with dried, untrimmed plant material. Then zip it back up.
- 3 SHAKE, TWIST, AND TUMBLE** the product for a few minutes. Friction trimming removes excess leaf matter, and the final twist screens it into bottom collection chamber.
- 4 REMOVE TRIMMED LEAVES** from the collection area at the bottom by unzipping the bottom zipper, and pouring.
- 5 UNZIP THE TOP** and remove or pour your newly trimmed product for final cleanup.

Saves you hours on each trim session!

TRIMBAG PACKS FLAT TO EASILY TAKE ANYWHERE YOU NEED IT.

MULTIPLE HANDLES TO EASILY TUMBLE YOUR PLANT MATERIAL

EASY-POUR ZIPPERS FOR BOTH TOP AND BOTTOM CHAMBERS
